

# A Miniature Power Relay with 1-pole 10A Switching Capacity

- Compact single pole relay.
- Excellent switching performance for a variety of loads.
- Small, yet provide 8-kV impulse withstand voltage (between coil and contacts).
- Low coil power consumption (SPST-NO: 200 mW, SPDT: 400 mW)
- Coil insulation system: Class F (UL1446).
- IEC/EN 60335-1 conformed. (-HA Model)

### RoHS Compliant

- Note. Note. Values in the above table are the initial values at 23°C.

  \*1. The contact resistance is possible with 1 A applied at 5 VDC using a fall-of-potential method.

  \*2. Testing conditions: The insulation resistance was measured with a 500 VDC megohmmeter at the same locations as the dielectric strength was measured.

  \*3. This value was measured at a switching frequency of 120 operations/min.

### Maximum Switching Capacity

### ●Ambient Temperature VS. Maximum Coil Voltage

Note. The Maximum coil voltage refers to the maximum value in a varying range of operating power voltage, not a continuous voltage.

### ●Shock Malfunction

Number of Relays: 5 pcs
Test conditions: Shock is applied in ±X, ±Y, and ±Z directions three times each with without energizing the Relays to check the number of malfunctions.
Requirement: None malfuction 100 m/s²
